SNOUF

## What is it

- Snouf is the main event that was created with the aim to become the meeting point "artisans of smell" and creating the opportunity to meet and discuss with lovers and expertise of this niche field.

## Why

- Our target is to recreate the atmosphere of the Wunderkammer, where passionate collectors and lovers could declaim their acquisitions resulting from travels and research and here the exhibitors can do the same by illustrating their project, their creations and their concept in the manner of literary salons.

# What does it consist of

- Emerging niche brands will take turns in different workshops and talk show during 3 days of the event and will come into direct contact with all lovers, answering all their curiosities, showing some unreleased works and previewing some new releases.

# Placement

- It is therefore not only a commercial trade fair, but also a prestigious initiative in a historic residence, which aims to attract artistic, niche brands and excellences from the world of research perfumery.
